

# DAD-C1 OBD Interface Configuration

Manual

I324247

## 1. REQUIREMENTS

- Windows 10 Bluetooth emissions platform

## 2. COMPATIBLE SOFTWARE

- Platform Configurator software version 1.8.3 or greater
- WGTS3 version 2.0.4 or greater
- WGTS3UK petrol test plugin version 1.1.0 or greater
- WUKS2 diesel version 2.2.2 or greater
- Continental DAD-C1 driver installer (included in compatible emissions software packages)

## 3. ADD THE BLUETOOTH DAD-C1 BLUETOOTH DEVICE

**Power the DAD-C1 OBD interface by connecting it to the vehicles diagnostic socket**

Launch the **Settings** app in Windows 10

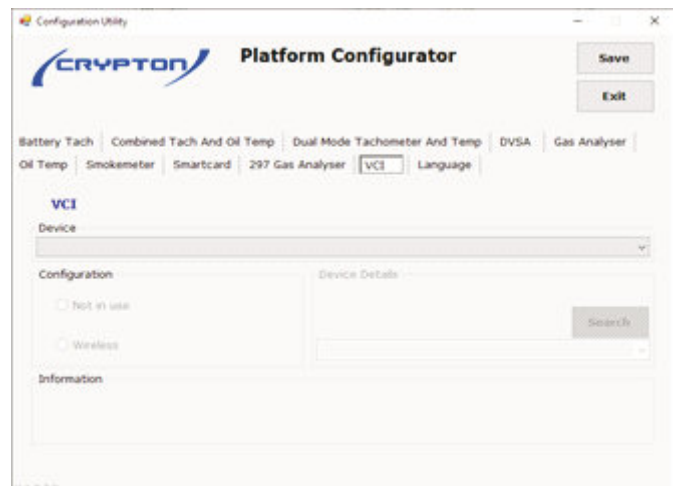

**Type settings in the Windows 10 search bar, or select the Settings icon found in the start**

- Select **Devices** from the Settings page
- Select **Add Bluetooth or other device**, then select Bluetooth as the device type to add; Windows will begin searching for discoverable devices.
- Select your DAD-C1 VCI on the list of discovered devices, Windows will begin adding the device, wait for confirmation the DAD-C1 has been added successfully.
- Pairing is complete, close the Windows 10 Settings app

## 4. CONFIGURE DAD-C1 FOR USE WITH CRYPTON APPLICATIONS

Launch Platform Configurator software;

**Type Platform Configuration Utility into the Windows 10 search bar or select Crypton from the Windows start menu and then Platform Configuration Utility.**

- Select the VCI tab
- Click the Device selection list and select Continental DAD-C1.

- Select Wireless from the Configuration options.

- Ensure the DAD-C1 VCI is powered, click the **Search** button.
- Your device Bluetooth details will be discovered, when complete the discovered device details are shown.

**Note: If more than one DAD-C1 is discovered you will need to select the device to be configured from a selection list shown on-screen, refer to the device serial label to identify the device.**

- Click **Save** to write the DAD-C1 device settings to the computer.
- Exit the program.
- Configuration Complete.
