EB30-2R – Crypton Factory Upgrade

DCR0028
09-03-06

Why not consider a new lease of life for your old Crypton Braketester?

This is an original Crypton factory upgrade for your existing EB30/EC30 Braketester, using a refurbished pit unit, the latest electronic sensors and a brand new control cabinet.

A “state of the art”, MoT approved, commercial Braketester at a fraction of the cost of a complete new unit.
